Why Us?

Production Facility

Encore Exim LLP has the capabilities to produce **4 million** industrial FIBC bags per annum as per customer requirements with international standard clean room facility, highly advanced machinery, and an advance equipped quality control laboratory managed by highly experience and expertise staff.

Production Facility

Extrusion: We produce 750 kgs per hour of PP tapes of various GSM and Strengths. We have the Beta gauge machines which continuously checks the size and the denier of the tape.

Looms: High speed circular looms to produce quality fabric of any width and GSM.

Belt Weaving: Needle loom Machine for Loop and Dust proof making.

Fabrillator: Fabrillator machine for pp thread for food grade bags.

Lamination: Extrusion Coating Plant for fabrics lamination (width 2.2 meters).

Fabric Cutting: Jumbo Bag Auto Fabric Cutting Lines of 60" & 80" widths.

Belt Cutting: Auto Belt/Webbing Cutting, Folding and marking machines.

Printing: Printing Machines (4 colour).

Liner Plants: Multi-layer extrusion Plant for Liner.

Gluing Machine: For glue fitted Liner.

Metal Detector: For Food grade FIBC bags.

Cleaning Machine: For remove if any contamination.

Testing Lab: We have latest equipment of Tensile Testing, Elongation Testing, UV Testing, Load Test, Dart Impact Test, COF Testing & RIG Test to ensure Tape, Belt, Fabrics and bag quality.
